

Lesson 161: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 161.

Lesson 162: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 162.

Lesson 163: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 163.

Lesson 164: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 164.

Lesson 165: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 165.

Lesson 166: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 166.

Lesson 167: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 167.

Lesson 168: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 168.

Lesson 169: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 169.

Lesson 170: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 170.

Lesson 171: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 171.

Lesson 172: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 172.

Lesson 173: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 173.

Lesson 174: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 174.

Lesson 175: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 175.

Lesson 176: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 176.

Lesson 177: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 177.

Lesson 178: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 178.

Lesson 179: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 179.

Lesson 180: Observe, reason and explain

Read the evidence carefully. Explain what you noticed, compare two possible answers, and test your reasoning with a partner. This is production audit page 180.

LEARNING TARGETS

Learning targets for Page 180

- ☐ Identify and analyze key patterns accurately
- ☐ Apply standard problem-solving strategies in context
- ☐ Explain mathematical reasoning clearly using visual models
